# myBühler Punchout.

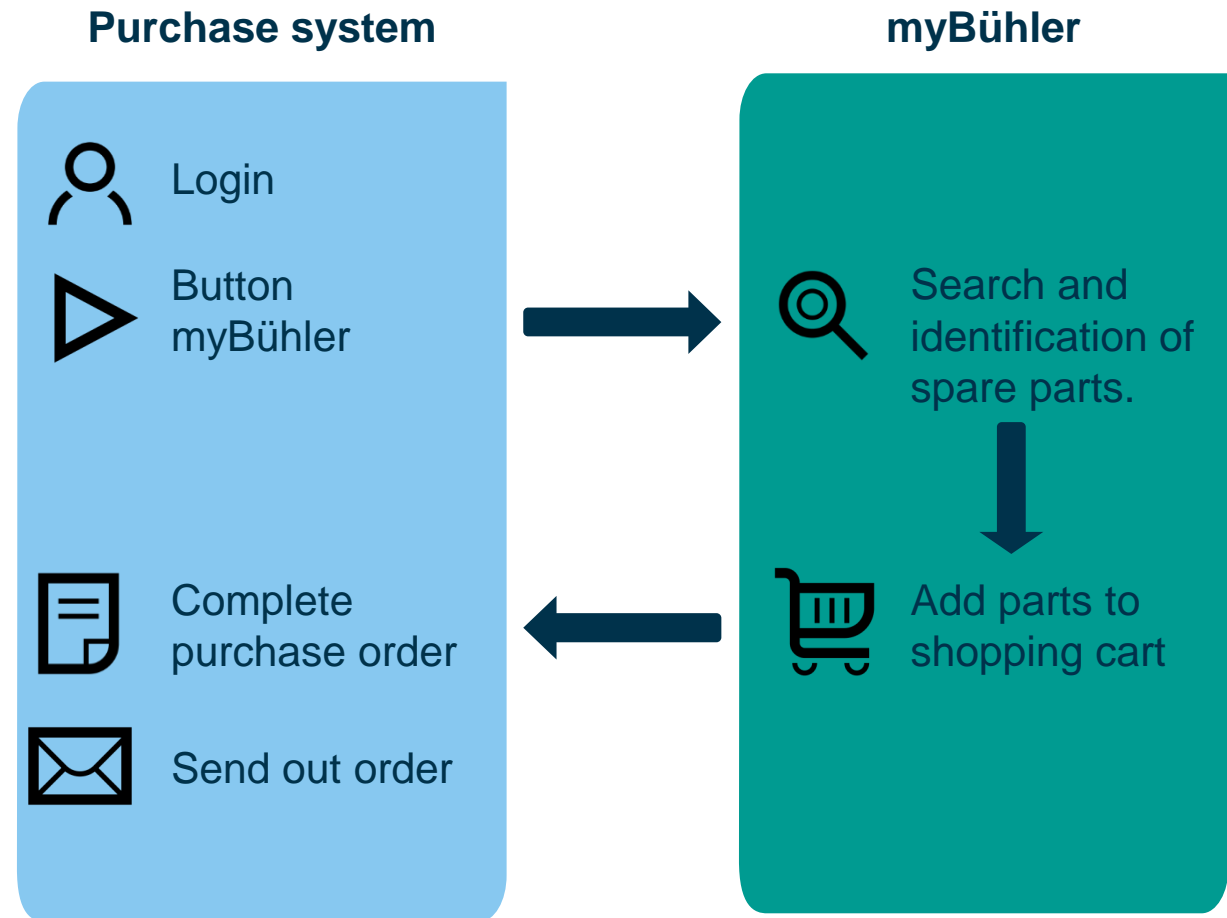

## Integration in to your purchasing process (system integration)!

### Benefits

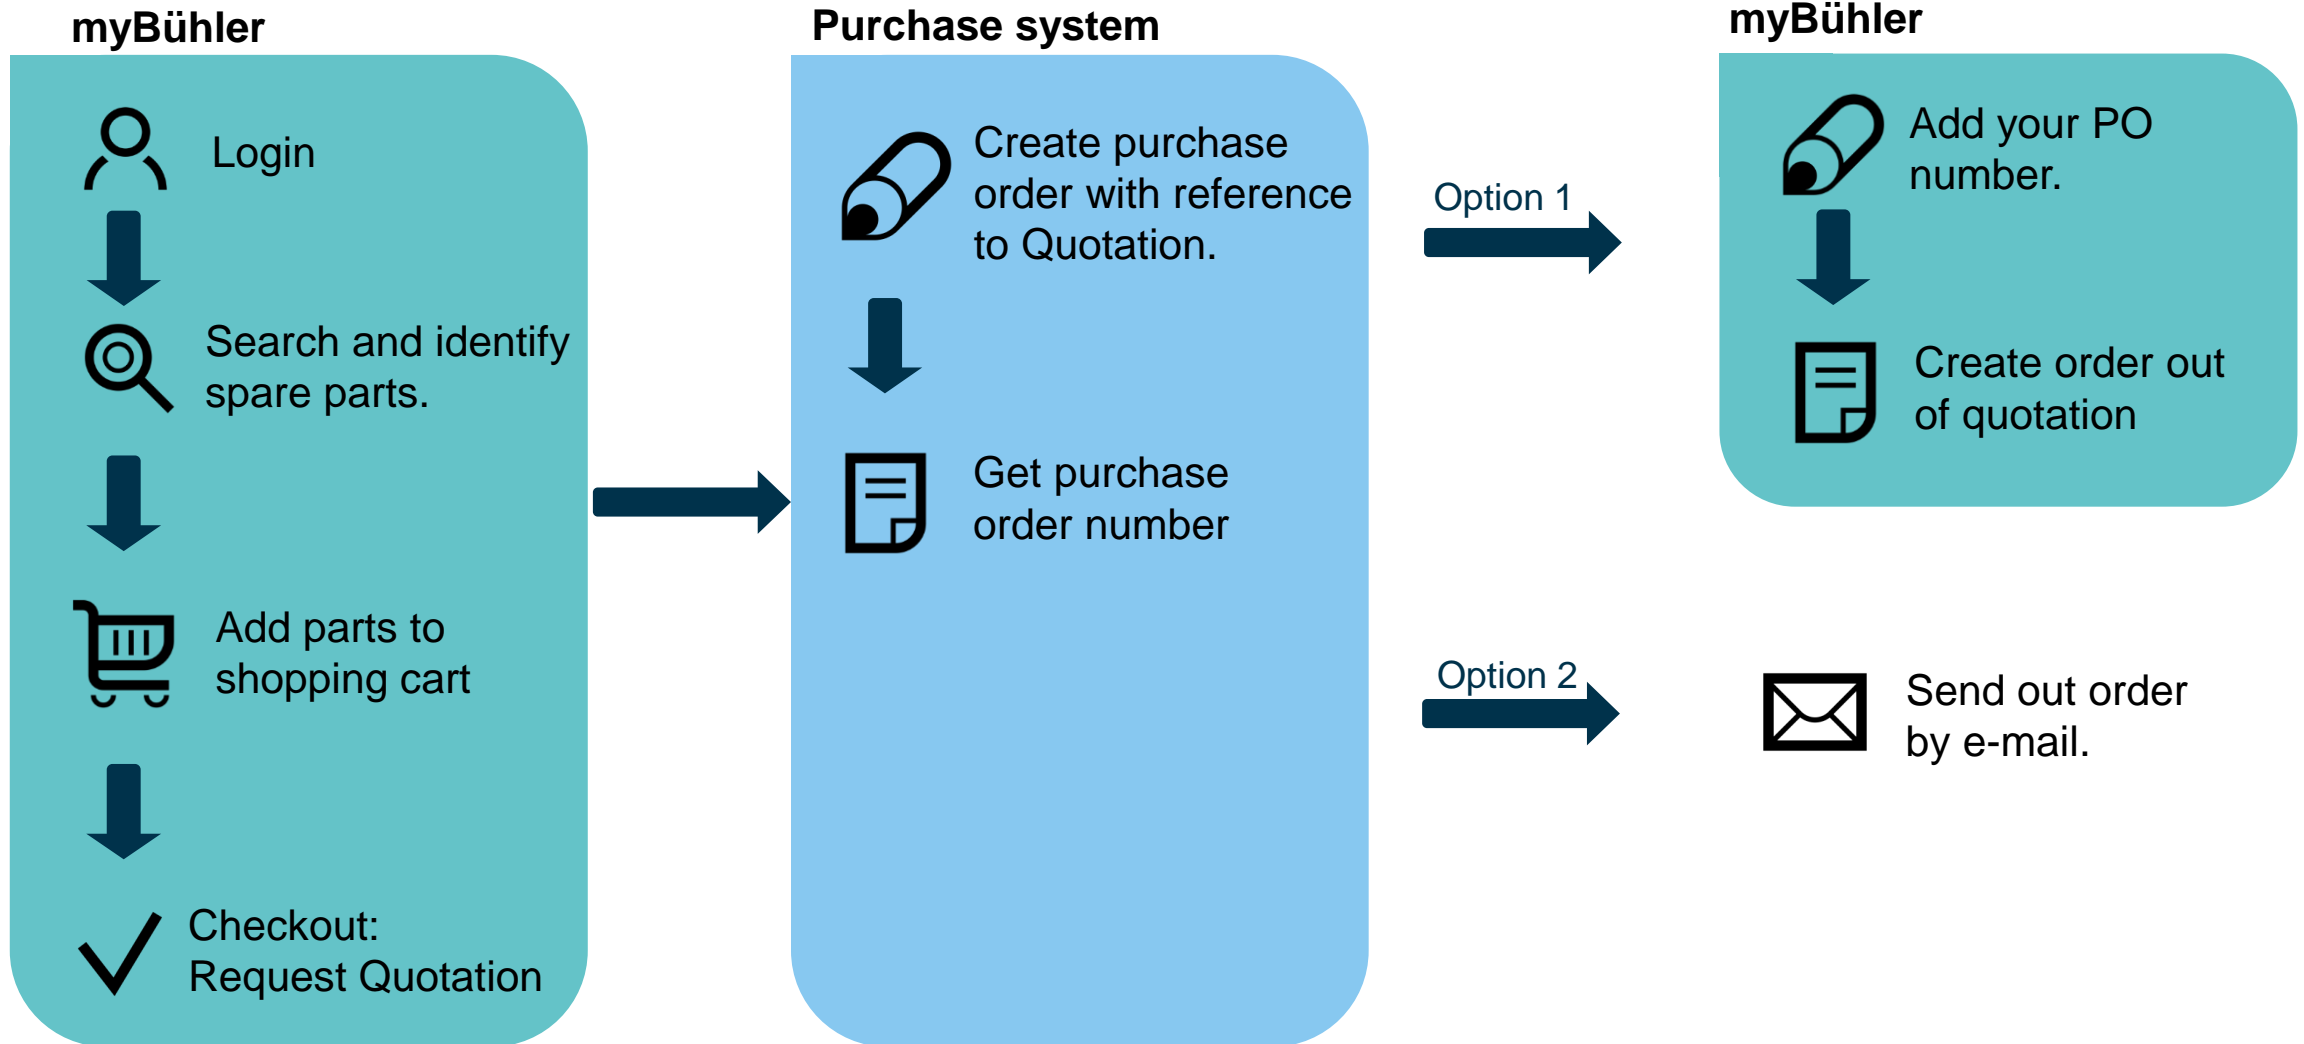

- As a customer you will get direct access from your purchasing system into myBühler.
- Browse through myBühler to search and identify your required parts and add them to your shopping cart.
- Finally your shopping cart can be transferred with one click into your purchasing system.
- Finalize your purchase request and send out the order.

### Facts

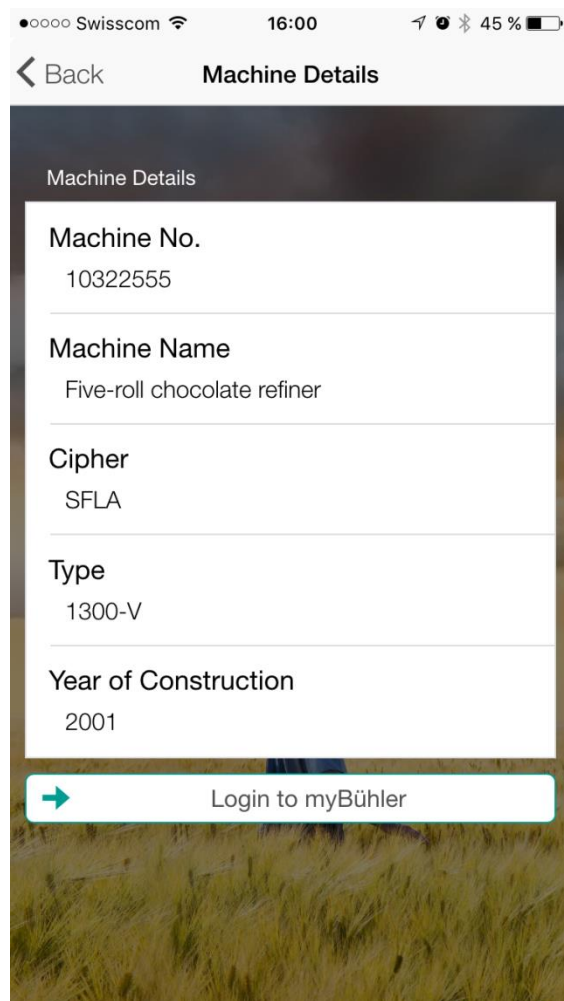

- Setup of the interface will cause effort on both sides and therefore needs to be checked before realization.
- myBühler uses a standard technology for the interface called OCI (Open Catalog Interface). Further technologies can be added on request.
- Further details and customer specific requirements have to be checked before realization.

# myBühler speeds up your purchasing process.

# myBühler App.

# NOVAPRIME & NOVABLUE

Innovations for a **better** world.

**BÜHLER**

# Customer survey

## What our customers want...

Important properties for plansifters

- Food Safety
- Operational reliability
- Easy maintenance
- High performance
- Various

# Bühler products & services ...and how we fulfill their requirements

## NOVABLUE

Bristleless and optically detectable sieve cleaner

**SIEVE TENSIONING**  
Bühler service quality

## NOVAFIX

Glue for best adhesion

**Products  
&  
Services**

**Thermal treatment**  
of insertion frames

**Conditioning**  
in climatic chamber

**NOVAPRIME**  
High quality  
Bühler sieve fabric

# NOVAPRIME

## Bühler sieve fabric

For tensioning, we use our new **high quality Bühler NOVAPRIME sieve fabric**.

With NOVAPRIME, Bühler now provides its own sieve fabric, which is optimally adapted to the specifications of the various plansifter types.

Made of polyamide (PA) plastic yarn, it provides the highest accuracy in terms of size and uniformity of meshes.

We also offer a sieve tensioning service for steel mesh.

[product catalog](#)

# NOVATENS

**NOVATENS** is a **pneumatic stretching system** for tensioning of insertion frames for plansifters and purifiers.

- Frame sizes 500 – 730mm
- For wooden and aluminum frames as well as for insertion frames made of stainless steel.
- All types of sieve fabrics, i.e. polyamide (PA), polyester (PET) and metal mesh.

## Advantages

- Easy handling
- Suitable for all frame types and fabrics
- Uniform stretching in all directions

# Blue colored and metal detectable plastics

## What is already on the market?

### Problems of food industries

- risk that during production fragments of plastics contaminate end products
- bad consequences for product quality, consumer health and reputation
- higher food safety requirements

### Application examples

- metal detectable silicone rubber gaskets
- metal detectable plastics
- other detectable equipment

# NOVABLUE

## Bristleless and detectable sieve cleaner

### Food safety

The new sieve cleaner NOVABLUE is our answer to increasing food safety requirements.

**NOVABLUE** comes **without bristles** and is **detectable**.

### Customer benefits

- no more bristles → highest sanitation
- blue colored material → optical detectability
- optimized weight → longer service life of the sieve fabric
- ferrite additives → metal detectability

# NOVABLUE Application

## For flour sieves

For our customers who prefer cleaners for flour sieves without bristles or for those who are not allowed to use sieve cleaners with bristles, the new NOVABLUE is the perfect solution.

NOVABLUE is suitable for use in the production of **hard and soft wheat** as well as **durum**.

# NOVABLUE

## Application

### Replaces classical cleaners

Offering the same performance, NOVABLUE can replace the conventional sieve cleaners with natural or artificial bristles and cleaners with nubs, which were used for flour sieves.

**NOVABLUE** is suitable for cleaning of sieve fabrics with mesh sizes from **85 µm to 250 µm**.

The high quality elastomeric plastic is temperature-, fat- and enzyme-resistant.
