Flour Heat Treatment

SUNIL MAHESHWARI
SIEMER MILLING COMPANY
TEUTOPOLIS, IL USA

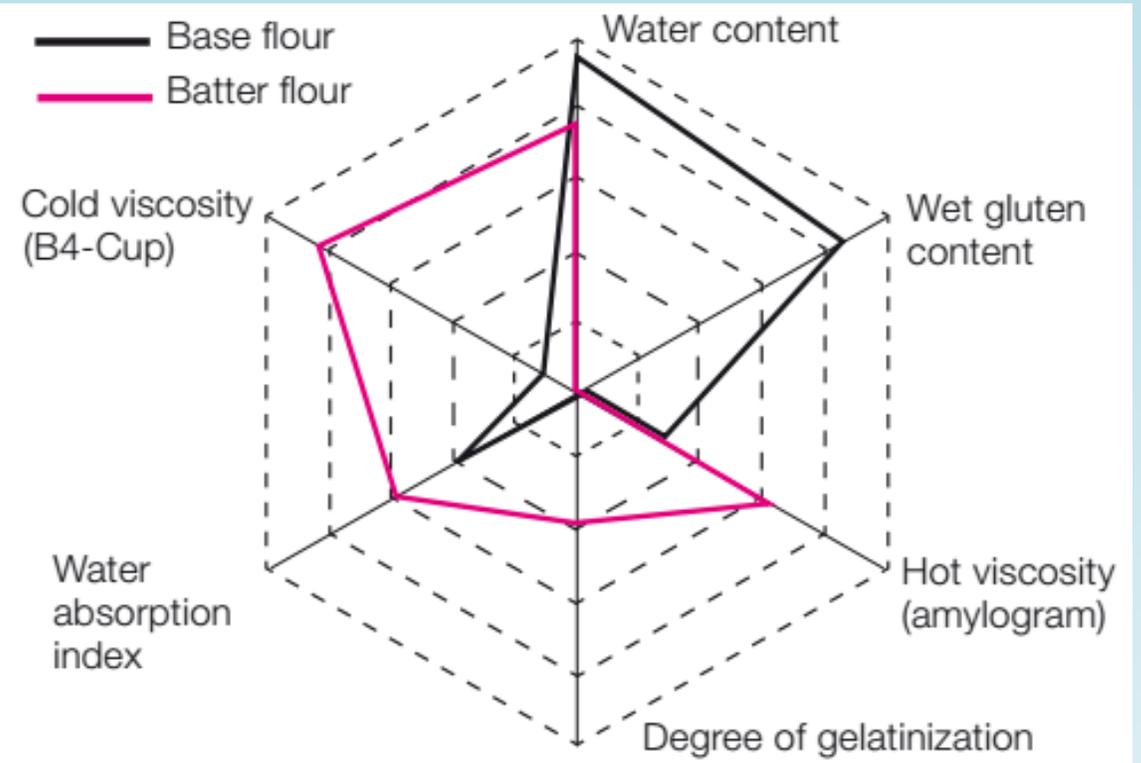

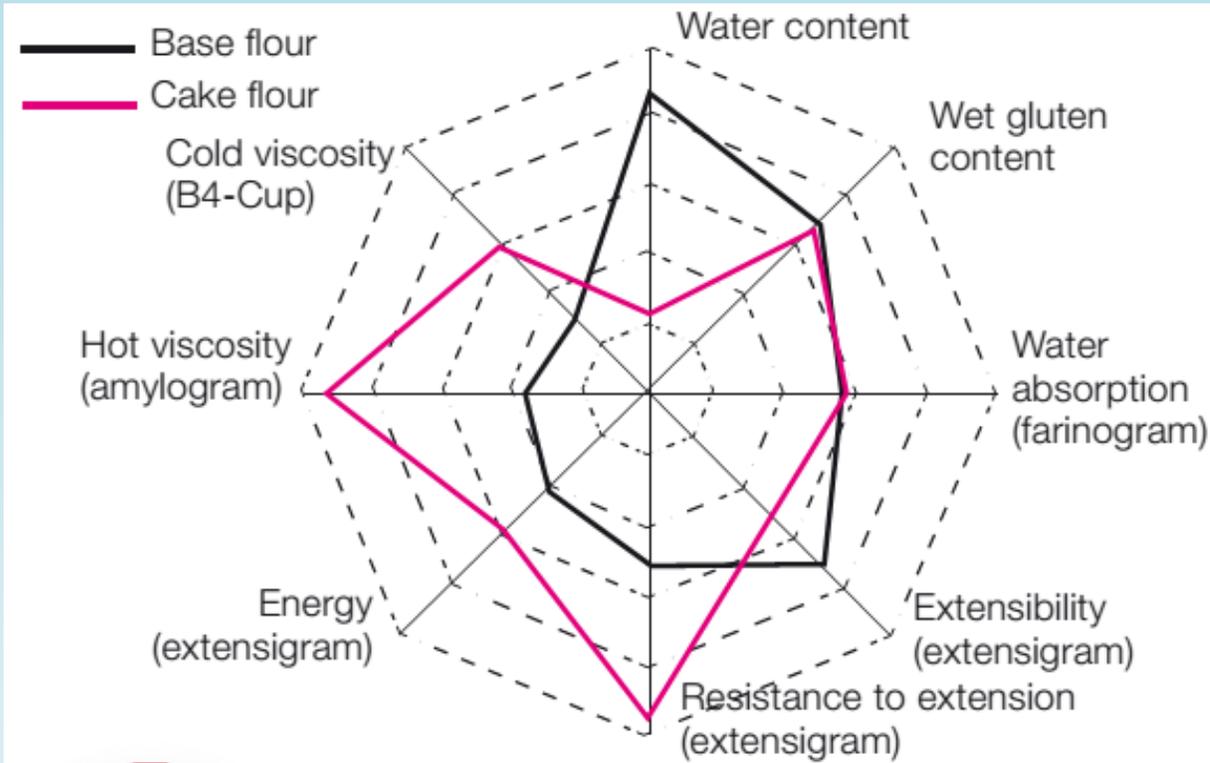

INTERNATIONAL ASSOCIATION
OF OPERATIVE MILLERS

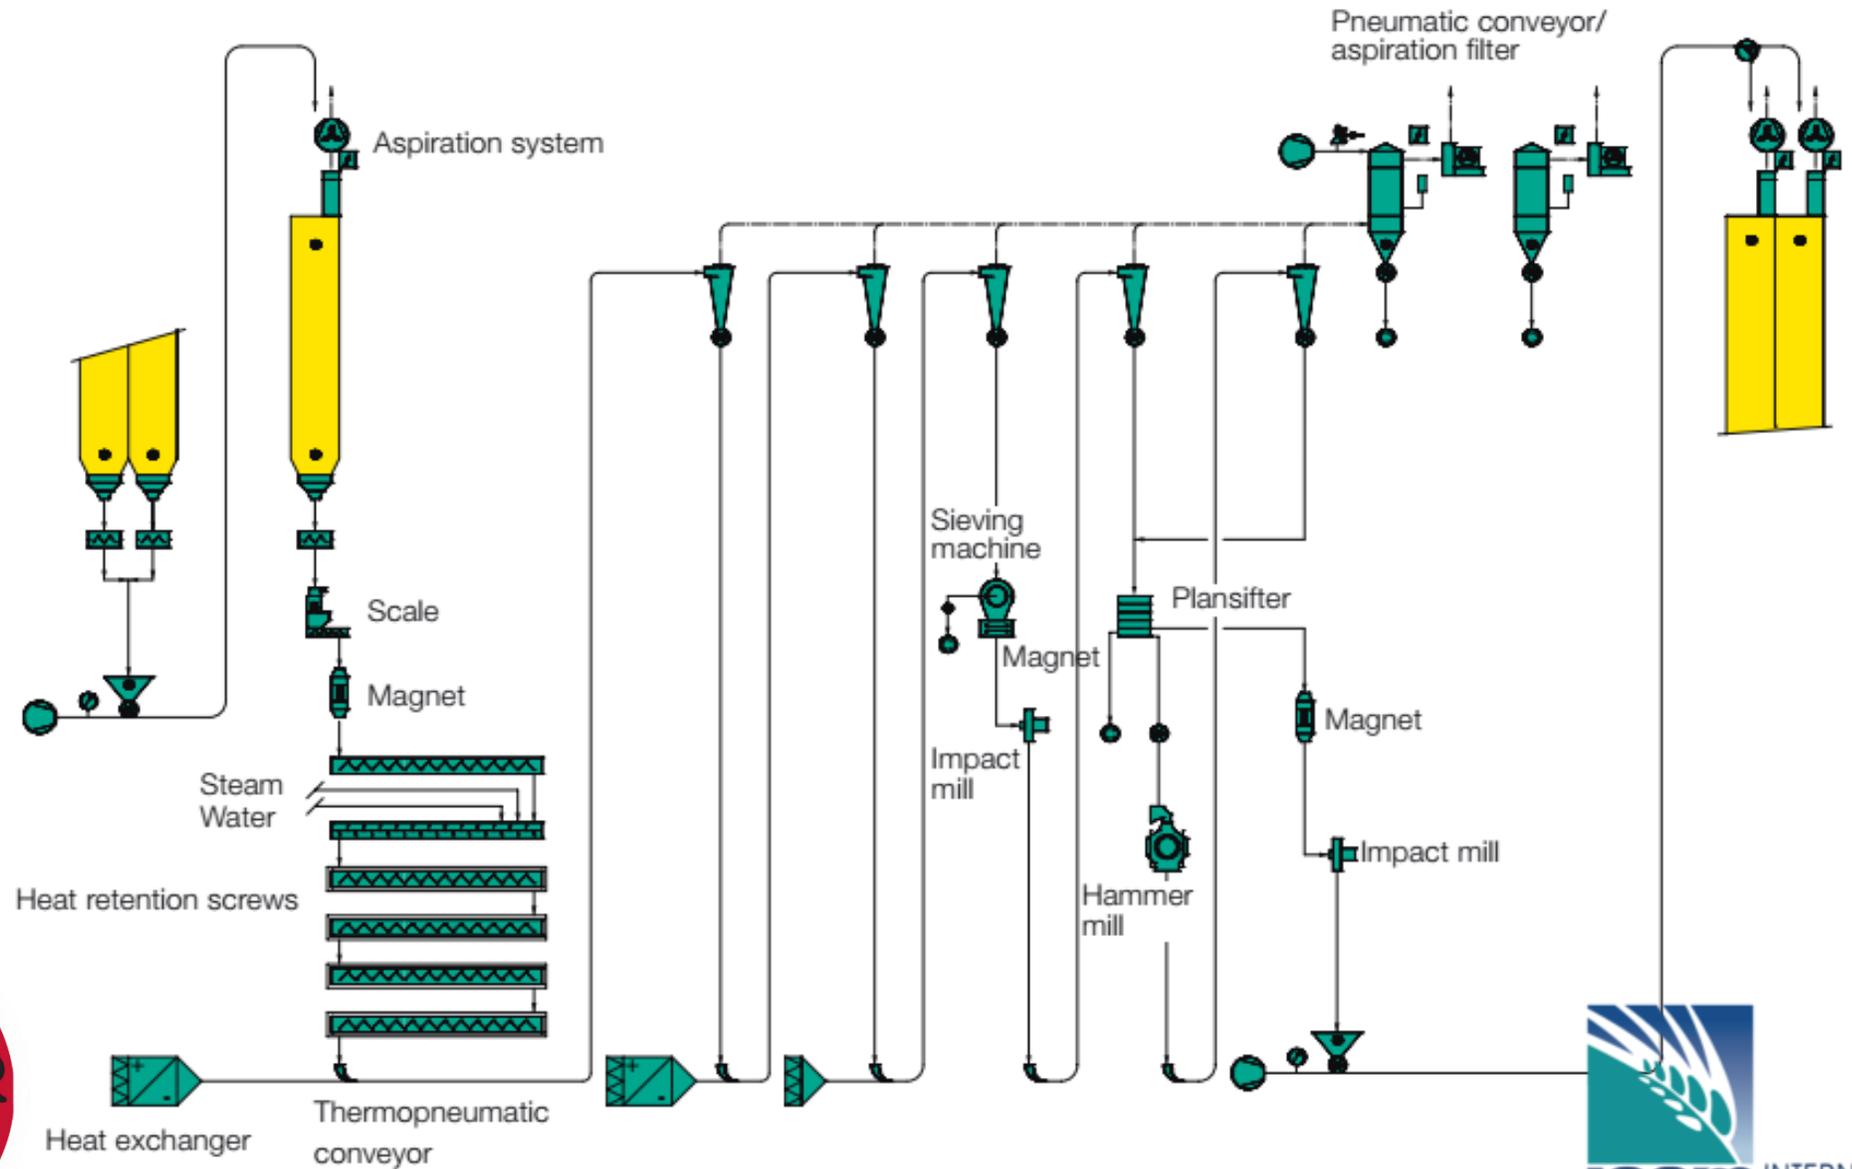

What is Flour Heat Treatment?

- Flour Heat Treatment is a process designed to modify the properties of flour.
- Divided into two basic processes:
 - Hydrothermal treatment
 - Thermal treatment
- Stabilize Germ, Bran and Whole Wheat Flour.

FHT – Product Properties

INTERNATIONAL ASSOCIATION
OF OPERATIVE MILLERS

Siemer FHT 1 Plant 2003

OF OPERATIVE MILLERS

Process – Key Elements

- Time
- Temperature
- Moisture
- Particle Size
- Viscosity
 - Cold Water Viscosity
 - Hot Pasting Viscosity

FHT – Viscosity Adjustment

FHT – Starch Molecule Changes

Before Treatment

After Treatment

FHT Product Application

- Food Safety
- Soup, Sauce and Gravy
- Batter and Breading
- Non-Chlorinated Cake Flour
- Stabilized Bran, Germ and Whole Wheat Flour

FHT Product Application

- Food Safety
 - Validated 5-log microorganisms reduction
 - For products that may be consumed raw: ice cream inclusion, seasoning blends, etc.
 - Unique process for greater control of microbiological presence
 - Longer shelf-life

RECALL

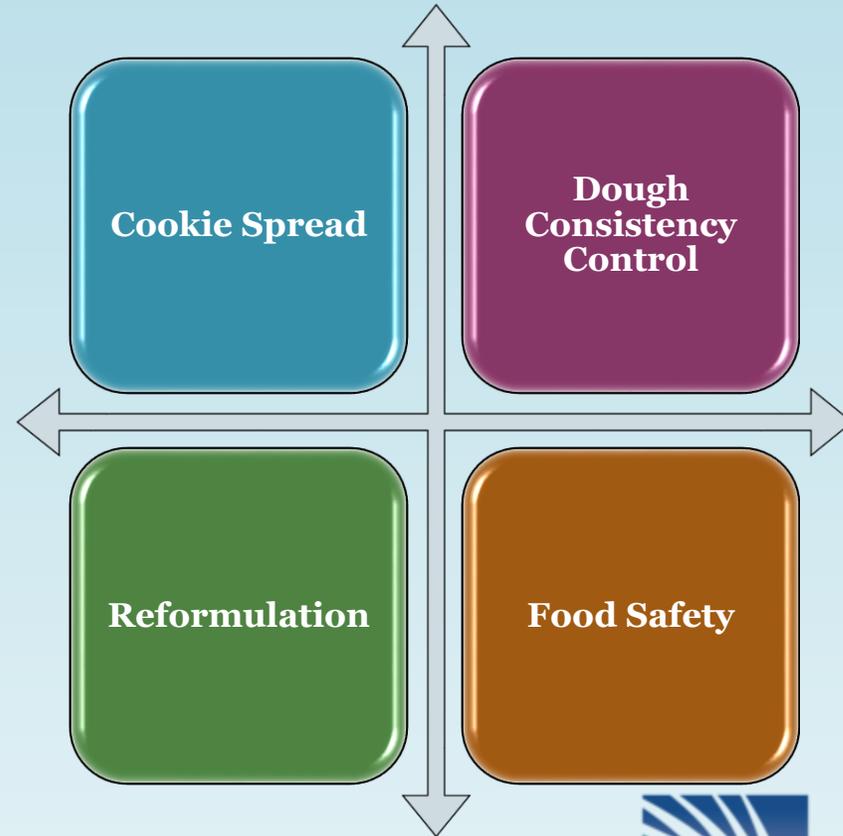

FHT Product Application

Pastry Flour

HT 2000

INTERNATIONAL ASSOCIATION
OF OPERATIVE MILLERS

FHT Product Application

- Soup, Sauce and Gravy
 - Replacement of chemically modified food starch; clean label
 - Stability
 - pH
 - Shear
 - Freeze-thaw
 - Viscosity
 - Optimum/clean flavor profile
 - Cost-effective

FHT Product Application

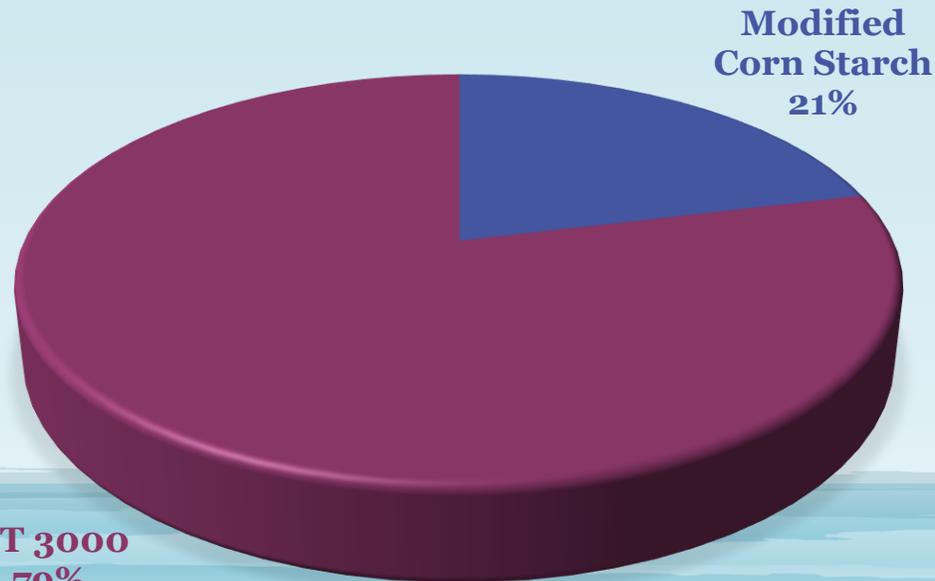

Ingredients	Modified Starch	HT 3000
	Solid/Liquid	Solid/Liquid
Str. Gr. Wheat Flour	6.6%	6.6%
Modified Corn Starch	0.4%	x
HT 3000	x	0.7%
Oil/Fat	7.3%	7.3%
Salt	0.6%	0.6%
Black Pepper	0.2%	0.2%
Milk, Whole	100.0%	100.0%

FHT Product Application

- **Sensory Survey**
- A double blind taste test with consumers at a local grocery store
- 52 individuals tasted two samples of cheese sauce

CUSTOMER PREFERENCE

Appearance

Texture

Mouthfeel

INTERNATIONAL ASSOCIATION
OF OPERATIVE MILLERS

FHT Product Application

- Batter and Breading
 - Highly controlled batter viscosity; even coating on substrate
 - Superior adhesion to substrate; prevent moisture from migrating to the other substance components
 - Crispy-to-crunchy textures
 - Extend hold times under heat lamp

FHT Product Application

Tempura Coating Ingredients	Weight	Percentage
Wheat Flour/HT Flour	150 g	72.8%
Corn Flour	40 g	19.4%
Salt	6 g	2.9%
Seasoned Salt	2 g	1.0%
Baking Powder (MCP & SAPP)	6 g	2.9%
Milk Powder	1 g	0.5%
Dextrose	1 g	0.5%
Water (40 F)	290 g	140.8%

Non-HT Flour

HT 8500

FHT Product Application

Left: Str. Gr. Flour vs Right: HT 3500

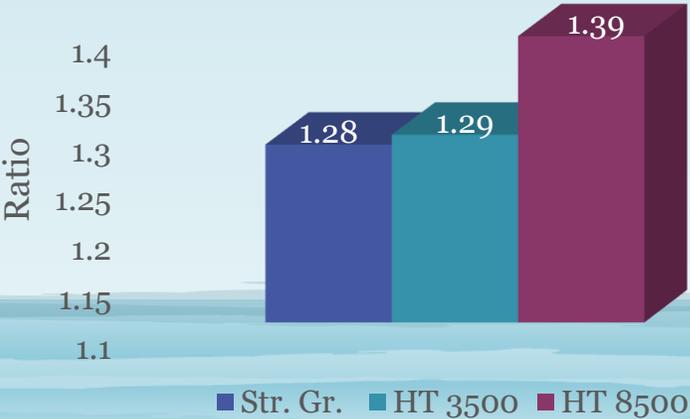

Left: Str. Gr. Flour vs Right: HT 8500

FHT Product Application

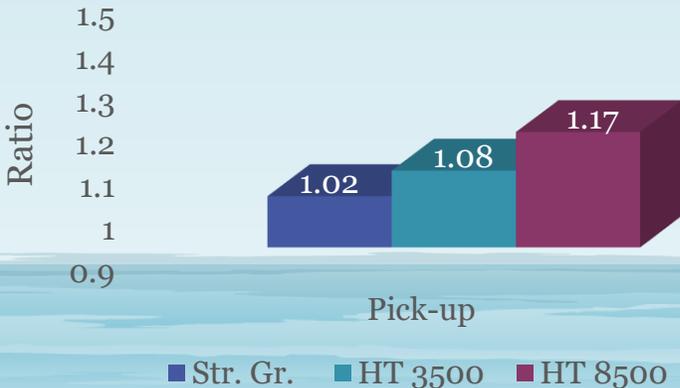

Complete Batter Viscosity

Pick-up Pre-frying

Pick-up Post-frying

INTERNATIONAL ASSOCIATION OF OPERATIVE MILLERS

FHT Product Application

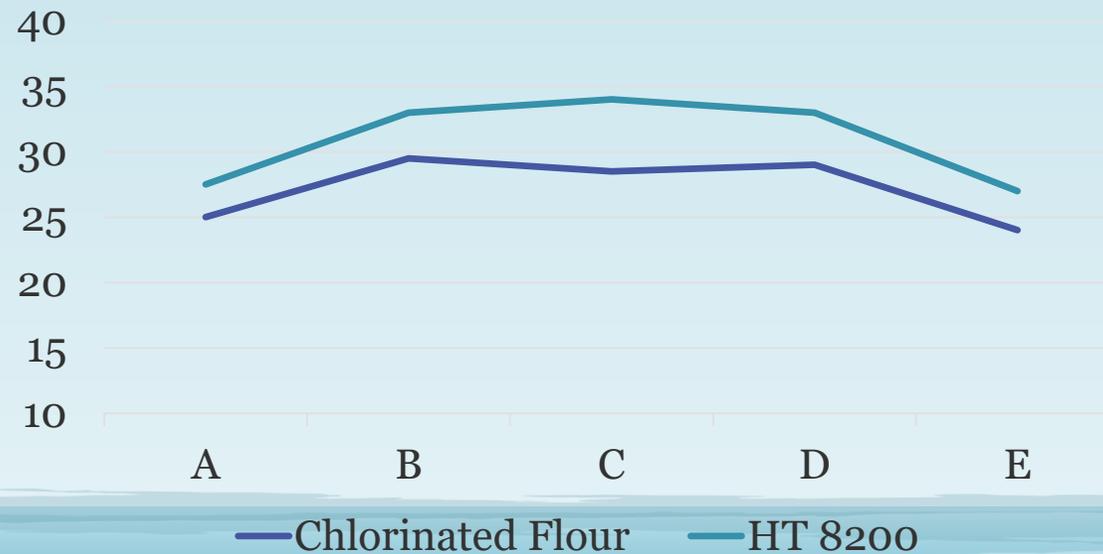

- Non-chlorinated Cake Flour
 - Clean label - without chlorination and bleaching
 - Used for cakes with high sugar and fat contents
 - Improved appearance and texture

FHT Product Application

Cake Volume

FHT Product Application

- Stabilized Bran, Germ and Whole Wheat Flour
 - Extend shelf-life – 6 to 9 months at ambient temps
 - Deactivate enzymes
 - Does not alter nutritional profile or label ID
 - Pleasant nutty flavor

FHT Product Application

HT Germ Bread

Thank You!
