- **Exchange Ideas**
- **Develop Professionally**

**IAOM exists to help you get better at what you love to do!**

## INTERNATIONAL ASSOCIATION OF OPERATIVE MILLERS

The International Association of Operative Millers was organized in 1896 to provide educational opportunities in the technological and managerial endeavors of the grain processing industries. The organization operates on an international basis, and its membership is divided into districts for furthering the localized interests of the milling community.

The Association further seeks to promote a spirit of fellowship and cooperation among the operative millers and those industries and individuals allied or closely associated with the milling industry.

An annual global meeting with a technical conference and expo is held to provide a common gathering point for worldwide participation by operatives, managers, educators and the allied trades. A wide range of topics is presented at both general and breakout sessions at the conference, and an endless variety of equipment and services is demonstrated on the expo floor.

The district and regional meetings and technical conferences, generally held on an annual basis, permit members unable to attend the annual conference to hear similar presentations on both technical milling and management techniques.

Membership information may be obtained from any current member, at the registration desk, or by writing to:
